

Product Guide

Fire, Smoke, Heat & CO Alarms

When Lives are at Risk,
it Pays to Fit the Best!

Special Needs Systems

Under BS 5839: Part 6: 2004, it is essential to identify any special needs that tenants may have and to adequately address them to ensure they have the correct level of fire protection.

For many years Aico and Ei have specialised – and led the field – in the development and provision of fire safety technology to help responsible landlords protect vulnerable tenants.

features and benefits

- Mains powered control panel with rechargeable battery back-up
- High intensity integral strobe light
- Vibrating pad for placing under a pillow or mattress
- Auxiliary sockets (2 on Ei170RF) for connection of additional optional strobe lights or vibration pads
- Capability for interconnection with up to 12 alarms
- Test button on control panel for testing the system
- Connections are monitored to check integrity of system
- Alarm clock input facility
- Pager output facility
- Compatible with RadiOLINK alarms systems (Ei170RF, Ei176RF only)
- Systems available for mains or battery operated smoke alarms

Alarm Systems for the Deaf & Hearing Impaired

People with hearing difficulties require a different approach to fire protection, as a conventional alarm sander will not be sufficient for their needs. Aico's range of alarms for the deaf and hearing impaired are the only units currently available from an experienced smoke alarm manufacturer. They are also available with RadiOLINK to remove the need to run wiring upto the alarm system and so provide quick and easy installation.

Special Needs Systems
